PERSONAL OBJECTIVES

As a frontend developer with over four years of experience, I am passionate about creating beautiful, intuitive, and responsive websites and apps that are delightful to use. I have expertise in various programming languages, frameworks, and libraries, such as NextJS, React, Typescript, NestJS, ExpressJS, SQL, Styled Components, Tailwind CSS, Material UI, Bootstrap, SASS and many other npm packages.

For the past months I worked as a dedicated Software Engineer at Thrillers Travels, I have had the opportunity to single-handedly design the frontend of a cutting-edge real estate website. Leveraging my skills in Next JS, React, TypeScript, Styled Component, Material UI, Google Maps API and some other packages, I created a responsive and user-friendly interface that enhances the user experience. My commitment to quality and attention to detail has allowed me to deliver a high-performing product that would certainly exceed client expectations.

From July 2022 to January 2024, I worked as a frontend developer team lead at Talosmart, a company that provides innovative solutions for clients across different industries. I was responsible for assigning tasks and supervising other frontend developers in all company projects, handling weekly presentations to clients, managing the company's GitHub repository, debugging existing projects, and writing clean and dry code. I also contributed to the design and development of several projects, using my skills in responsive web design and debugging to ensure customer satisfaction and quality standards. I am a team player who seeks to proffer solutions to professional challenges, utilizing my interpersonal skills and excellent time management. I am also a strategic thinker with a result-oriented personality, able to manage multiple projects with a positive attitude and achieve team objectives.

WORK EXPERIENCE

March 2024 – till date

Talosmart ▪ **Software Engineer** ▪ Lagos, Nigeria.

- Successfully designed and developed the frontend of a sophisticated real estate website, ensuring an intuitive user interface and seamless user experience.
- Utilized modern web technologies, including Next JS, React, TypeScript, Styled Component, Material UI, Google Maps API and some other packages, to create responsive and visually appealing web pages.
- Collaborated with the backend development team to integrate APIs and enhance the functionality of the website. Implemented best practices for web development, including code reviews, testing, and performance optimization.
- Conducted user research and feedback sessions to continuously improve the design and usability of the website.

- Delivered the project on time, exceeding client expectations and contributing to the company's portfolio of high-quality web solutions.

July 2022 – January 2024
